Driveway Construction/Repair Standards

- I. All driveways in the City of Hazen shall be constructed/repared as per the specifications indicated on Page 2, using a six (6) bag mix.
- II. If the installation of the driveway involves the removal or alteration of the curb and gutter, the curb and shall be cut, removed, and installed as per the specifications indicated on page 2, using a six (6) bag mix.
The curb and gutter shall be formed front and back and shall not be paved into the asphalt area of the street. The asphalt adjacent to the curb and gutter replacement shall be cut a minimum of eighteen (18) inches from the gutter for the length of the replacement area, removed and placed on the street next to the curb and gutter.
- III. In all cases where a driveway is widened and the existing driveway was not constructed as stated in Section II, the lower three (3) feet of the driveway shall be cut and removed. The curb and gutter adjacent to the existing driveway shall then be removed and replaced as specified in Section II. The three (3) foot section of the driveway that was removed shall then be replaced.
- IV. Any repair or replacement of a driveway shall conform to the standards set forth in Sections I, II and III.
- V. The City shall replace the asphalt removed because of the curb and gutter replacement, as per section II, at a minimum rate of \$100.00. The \$100.00 minimum fee would cover the cost of replacing an area 18” by 16’. Any area greater than 18”x16’ will be charged at a rate of \$2.00 per square foot. The cost of the asphalt replacement will be billed to the contractor.
